PROFESSIONAL SUMMARY

Frontend Engineer with 3 years of experience building responsive, scalable web and mobile applications using React.js, Next.js, React Native, JavaScript (ES6+), and TypeScript. Delivered live production apps serving thousands of users, with strengths in reusable UI components, REST API integration, Redux state management, and performance optimization, plus full-stack collaboration with Node.js, Express.js, MongoDB, and MySQL in Agile teams.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3

Frontend: React.js, Next.js, React Native, React Hooks, Micro Frontend Architecture, Reusable Component Architecture, Component-Driven Development, Responsive Design

State Management: Redux, Redux Toolkit, Zustand, Redux Saga, Redux Thunk, Context API

Backend, APIs & Databases: Node.js, Express.js, RESTful APIs, API Integration, MySQL, MongoDB

Styling: Material UI, Styled Components, Tailwind CSS, SASS, Bootstrap

Testing & Version Control: Jest, Unit Testing, Git, GitHub, GitLab

Developer Tools & Methodologies: Jira, Rally, Trello, Asana, Agile, Scrum

Deployment: AWS, Firebase, Vercel

PROJECTS

RubiQRide - Ride-Sharing Platform (Driver & Passenger Apps)

June 2026 - Present | React Native, TypeScript, Redux Toolkit, Socket.IO, Google Maps, Razorpay

- Architected and built a live, full-scale ride-sharing platform engineered to handle 10,000+ concurrent rides, delivering separate Driver and Passenger React Native apps from scratch.
- Implemented real-time GPS tracking with Socket.IO at under 100ms latency and a live driver heatmap that clusters 500+ active drivers for efficient ride matching.
- Integrated Razorpay payments (UPI, cards, wallets), Twilio OTP with a 3-layer fallback, and Firebase push notifications, managing complex state with Redux Toolkit for responsive apps.

Yara International - Digital Farming Platform (Full Stack Developer)

February 2026 - July 2026 | React.js, React Native, Next.js, Node.js, Express.js, MySQL, MongoDB

- Delivered production support and feature work for an enterprise, international-scale digital farming platform used by farmers and agronomists across multiple regions.
- Investigated and resolved end-user production issues through Jira, performing end-to-end debugging across the React frontend and Node.js backend to fix critical defects quickly.
- Conducted root cause analysis and shipped long-term fixes that reduced recurring incidents and improved overall platform stability and reliability in a live environment.

IMS - Government Exam Preparation Portal

January 2025 - May 2025 | React.js, Node.js, REST APIs, Git

- Built a live exam-preparation web portal helping students prepare for competitive government exams (RRB NTPC, GUJCET) with structured courses, mock tests, and performance analytics.
- Developed dynamic React.js interfaces with reusable components, an admin panel for content management, and student progress tracking, integrating REST APIs with the Node.js backend.

JobVob - Job Search Mobile Application

June 2024 - December 2024 | React Native, JavaScript, Redux, REST APIs

- Developed a full-featured job-search mobile app with user authentication, job listing feeds, advanced filters, and an application-tracking dashboard for candidates.
- Implemented push notifications for new job opportunities and managed global state with Redux, designing reusable components for a smooth, performance-focused mobile UX.

EDUCATION

Bachelor of Computer Applications (B.C.A) | CGPA: 8.1

Veer Narmad South Gujarat University (VNSGU), Surat, Gujarat | April 2015 - March 2018
